

Rigging / Specialized Handling

Your turnkey program has been a tremendous help to us in both cost and coordination, especially with the used equipment. One phone call and it happens-no worries. Whether it's a delivery in San Jose, or a pick up in Los Angeles, or just temporarily warehousing product because the customer isn't ready to accept the material, you make it seamless. Thank you again for raising that bar.

Partner,
Shelving and Equipment Co.

The RK Logistics Group offers a diverse range of rigging and specialized handling services. Our logistics and rigging experts evaluate our customer's needs and select the equipment to complete the job in the most economic, timely, and safe manner.

Our team is experienced in handling light to medium size equipment such as hoods, bridgeports, lathes, and centrifuges to large manufacturing, industrial, semiconductor and or medical/lab equipment. Whether you need stair climbers, air bearings, a vermetti lift, a 30,000 lb. capacity forklift, or a crane, our team will assemble the equipment necessary to ensure a successful move from beginning to end.

Whether the move requires relocation of machinery or equipment within the facility, around the block or across the Domestic United States, we have flatbeds and specialized high cube trailers ready to handle the move.

Our goal is to help you determine the best way to accomplish whatever transportation challenges you may face so you do not have to worry about any of the details.
